SCANNER RENTAL
OPTIONS

There are two scanner rental options available at each HCP conference: rent our app and run it on your own device, or rent one of our hardware devices with the app pre-installed.

Suppliers can log into your My HCP account to rent the scanner option that best fits your needs. Both options allow you to capture the contact details, take notes, add follow-up dates, and search your scan history. Be sure to stop by the registration desk at the conference to activate the app or pick up your rented hardware device.

After you register your scanner with our registration team onsite, a spreadsheet will be emailed with detailed contact information for every badge scanned: name, job title, facility, address, phone number, email address, follow-up date, and notes.

FEATURES

Camera enabled for data capture

Use the camera feature to capture a photo of the barcode.

Reverse leads accessible on your scanner

In addition to seeing your scan data, you can also see your Reverse Leads on your scanner.

Additional prospect tracking

You also have the option to rate the providers' prospect status for your company, and search by your ratings or your notes.

RENTAL OPTIONS

Scanner Application Rental – User Device

$399

Install the scanner application on your own device for use during the entire conference. No need to worry about returning it after the show, and no security deposit is required. Scanner application is available for iOS and Android devices.

(NOTE: This option provides access to the scanner application only which will be downloaded on the user device; hardware devices must be rented separately at an additional charge.)

Scanner Application and Hardware Device Rental – HCP Device

$549

Rent an HCP hardware device to run the scanner application; scanner application and hardware device are both included. This is a great option if you want multiple people from your company to be able to use the scanner without having to share your personal device.

(NOTE: Hardware device rental requires $200 security deposit which will be placed as a credit card hold during the onsite checkout process to insure the hardware device. The hold will be released once the device is returned.)

Scanner rentals for both application and hardware device are non-refundable.

Hardware device rentals are subject to availability on a first-come, first-served basis and may not be available for rental onsite; if hardware devices are sold out, application rental for use on the user's own device will still be available.
